Nathan,

Please see the statement below:

In response to open records requests seeking documents related to allegations of fraudulent time entries within the Public Works Department, the City discovered a draft disciplinary letter related to a Director. Believing the document to be a final version, the document was produced as a supplemental production pursuant to the underlying requests. Unfortunately, City personnel later determined that the document was, in fact, a draft that was never provided to the Director. The City greatly regrets the confusion that this production may have caused.

Thank you,

Dan
